INTRODUCTION

This highly selective bibliography was prepared for use at the Eleventh Military History Symposium on "Military Planning in the Twentieth Century" held at the United States Air Force Academy, 10-12 October 1984.

The resources cited contain information on military planning before and during World Wars I and III, the effect of technology on strategic planning, the impact of Cold War tensions on strategic thought, and preparations for limited warfare in more recent years. United States planning efforts are emphasized, but works on the military planning of other nations are also included.

The bibliography was compiled by Mary Ann Robinson of the Reference Division of the Air Force Academy Library, assisted by Steven E. Maffeo. The manuscript was prepared for the printer by Sharon E. Johnson.
